Save The Landmark Cooling Towers!

The demolition of the Tinsley Cooling Towers in Sheffield was announced On the 28th September 2006 by its owner's e.on UK. These towers are historic to Sheffield and symbols of a once great industry in the city. They now provide a landmark gateway to the industrial centre of Sheffield, and are one of the city's only remaining iconic landmarks. If these towers are to be demolished I know I speak for many people when I say that the city will lose a great part of its identity and the towers will be sadly missed. In the past there have been several plans involving ideas of restoring them as a landmark, which is still just as possible if they are saved. This petition allows the people of the city, and those who know it, to decide what happens to the cooling towers.

We who sign this petition may be either admirers of the structures and the city, Historians, architecture enthusiasts or those who feel for this cause. Either way we strongly believe that the Tinsley Cooling Towers should be saved from demolition.

Sincerely,

The Undersigned

4266. Tinsley Towers Trust - J S Marfo - Our Trust has been formed to save the Landmark Cooling Towers from demolition and to develop their cultural, educational and recreational potential. English Heritage said that they consider them to be an important part of Sheffield's cultural and industrial heritage. An independent report has found that they are structurally sound and in remarkably good shape. The BBC online poll established that three quarters of the public want to see them saved. Discussions with E.ON have revealed that the Towers' location does not conflict with the outline of their proposed new biomass plant. The only argument used by E.ON at present is that it would be a 'safe demolition'. But why demolish something simply because it is safe to do so? Half a million pounds would be enough to extend the Towers' working life for another twenty years. The demolition of the Tinsley Towers is unjustifiable and we appeal to E.ON to listen to the people of Sheffield and preserve what is so important to so many of us. (www.tinsley-towers.org.uk)

4244. Claire Papka A very avid signature of Sheffield's industrial past. Knocking them down would not create free space that anyone would want as they would be living or working next to a sewage plant. Please do not tear them down. Seeing the cooling towers is a sign to many they are homeward bound especially those that live away from sheffield but will forever call it home. Please save them!
4243. Rhiannon Oliver The cooling towers are significant to every Sheffield and South Yorkshire resident that loves where they live and ever has to leave. Sentimentality means a lot to Yorkshire people and it makes me sick that public authorities never think about anything but money.

4106. Ivan Ingletto lets make art out of it
4105. Leah Rumble I now live down south on the Isle of Wight but previously lived in Leeds and worked in Sheffield. My husband grew up in the surrounding area. To me, the Tinsley cooling towers welcome you to Yorkshire and teach its visitors about its heritage. So much of Sheffield's special and invaluable heritage is already lost. Please don't allow these to be lost to future generations and to future inspired and creative use. How can any company carry this out and then ever claim to be environmentally friendly in any way?
4104. Leanne Glossop haven't lived in sheffield long, but everytime i see these amazing structures, i know that i'm home.
4103. Jonathan Burford I don't know if I'm to late at adding my comment, but I've only been to sheffield once, and the thing I remember the most is the towers. What harm are they doing? Let them be!
4102. Michel Bernard In Differdange (Luxembourg) the steel company arcelor mittal demolished the last cooling tower, symbol of the glorious industrial past of the grand duchy. I hope that in Sheffield there will be no repetition of such a crime against the industrial culture.

I think they are important for sheffield as they are iconic buildings for the City, I remember going to see a band from Manchester Long-View playing in Sheffield and the singer mentioned them when he was saying how much the band liked to play in Sheffield. An example of how they are part of the City. Getting rid of buildings like that isn't going to change the image of the town, Sheffield is not like Manchester and Leeds, in fact it will have the opposite of the desired effect of improving the cities image as it will another part of the towns charater destroyed.

- 3768. Helen Corker The cooling towers are a famous landmark of Sheffield; the sight of them on the horizon when I've been away reminds me that I'm nearly home. As "grim" and "unsightly" as some people say they are, they are an important link to, and reminder of, our heritage; Sheffield is still famous throughout the world for it's industrial past, and we shouldn't be ashamed of it!!! If we continue to replace older architecture with modern flat blocks etc then there will soon be nothing left of old Sheffield and we will become the same as every other big city. Let's retain our originality, and be proud of it!!

I myself am not really a spiritual person but anyone with half a brain can see that sheffield HAS its injection of business and opportunity, what it needs more of is the friendly and artistic talent rapidly emerging.

3587. alan allsop Too much heritage has been lost already. The existence of the towers could have a timeless value to the city, and the owners, far greater than any bland 'new development' which benefits only one single party. That party, e.on, could earn themselves much higher status and quality publicity from preservation of the towers with an ongoing sense of community rather than a short term profit from destruction.

3507. Andrew Kelly
3506. Rob Hancock Please do not demolish this greatest Sheffield landmark - it is part of the industrial heritage of the North!!
3505. Mark Pearson The towers are a symbol of my childhood growing up in industrial Sheffield. I have since moved away from the city but when on my return I get a warm glow when I see them on the horizon as I know that I'm home. Even my children share my delight in seeing them and even shouting the same line that I reeled off as a child to my own parents "Look!!!! theres the Salt and Pepper pots". An icon of Sheffield that will be sorely missed.

3496. Don Mullan You have friends too in Ireland
3495. Todd Doupner It would be a shame to see these towers destroyed. The video shows ways to use the towers and would make a landmark in Shieffield to go to. Myself, I live in the States and would want to travel to Sheffield to see the towers, it would make it a great tourist spot and bring in a profit for the city too. Another case study is down in Costa Rica, where the government decided to keep there rainforrest and makeit a tourist destination. There percentages of tourism has double over the past years since keeping there rainforrests.

2516. Shaun Wojcik For four years worth of publicity E.ON UK have spent a reputed £32 million to put their name on the FA cup. How much would it cost to put their name on the cooling towers and advertize to the passing motorists on the M1? May I suggest that the marketing department of E.ON take a look at cooling towers in Europe. I have seen, and have photos of decorated cooling towers in Poland. And on the Brussels ring road have seen a multi coloured illuminated cooling tower. Why not use some imagination and use the towers to promote E.ON instead of consigning them to being just a mere memory?

2340. Sarah Newsome Proud to be a Yorkshire woman
2339. Leon Henshaw The fact these towers are in such an ideal location to say something about our city is an opportunity not to be lost. 2318. Adam Thomas The towers should indeed stay. Also, They should become open to the public for visiting.
2317. Mark Sampson My wife and I lived in Sheffield for seven years and love the place. We think the proposed conversion of these landmark towers into something that will benefit the city and the community is a great idea.

2311. Andrew M Should be saved
2310. jon wright These are internationally important industrial structures that could easily have a life outside of the industrial world they were born to. If we readily knock down structures of this kind, we are severing links with our past in ways that will in future, appear clumsy and unintelligent.
2309. Vicky Rowberry The towers have been there as long as i have been born, they are just there and it would be a shame not to see them everyday as i go past!
2308. Helen Williams The towers are an important landmark. Imagine if they are gone - do we want Meadowhall to be the only defining landmark at Tinsley then? I certainly do not!

2302. Miss Joy Deighton I have looked out of my bedroom window at the cooling towers for nearly 30 years and it would be a great loss to not only myself but to the city as a whole. They

2268. Barry Birks By destroying the towers, you are in fact, stealing part of my heritage, and for what? a bit of profit? Are you so bereft of any originality, feeling a bit skint are we? I feel sorry for your shareholders, eking out an existence. Just go somewhere quiet and have another think. Create something positive that will be good for Sheffield, and good for your standing within our locality. For once drop the profit before all else, and the devil take the hindmost, it's such a sad, tawdry mindset

2121. Andy Graves they are part of sheffield's past and should be kept... what else has sheffield got to remind everyone what a great industrial heritage it has, there is Magna, but that's in Rotherham! Meadowhall stands on the once proud Hatfields, Don Valley Stadium stands on Brown Baileys.

Look at the high moors of the peak district - they're man made in their present treeless form but we don't say they should be removed. Keep the towers. They have grace
2092. Wendy Hart
2091. Jane Smith When ever I come back along the Tinsley Viaduct and the Cooling Towers come in to sight, I know I have come home!! They have been there forever! Please don't take away our heritage, it is all that is left of our proud Steel City!

2082. Abigail Buttery The towers have been a part of every christmas for our family, when I was little myself and my sister's and brothers thought that the towers were where Father Christmas made his presents. It would be a shame to see them go.
2081. sarah veysey
2080. Alan Booth Whenever we went anywhere as a kid seeing those towers always meant that we were nearly home. To my eyes they are as much an icon to Sheffield as the Battersea Power Station is to London. Turning them into a giant public art space is a genius idea. We must keep Bill & Ben.
2079. simon
2078. jane-marie wright The amount of architecture and prominent landmarks in Sheffield have already been destroyed over the years, to make way for flashy looking buildings. It is the rawness and familiarity of the towers which is their beauty, they are a gateway, and a welcome homecoming to travellers. The whole area should be regenerated into an arts and crafts village, or a theme park on the Industrial past of Sheffield. Knocking them down is just stripping another of Sheffield's heritage away.

2022. Jessica Baily Many people that I have met in Sheffield feel a strong attachment to the towers and a very definite attachment to their home city. It's really important for ordinary people to have a say in how their environment is shaped and developed. Otherwise people feel powerless and resentful of corporations and authorities controlling their lives and not listening to what they say. Please consider the views of the people of Sheffield, or you will lose our trust forever.

They are landmarks which can be seen for miles around and would be amazing if they were done up and turned into works of art. They are iconic structures that remind us of our industrial past. The land has been derelict and unused for years and I cannot imagine that it would be used to bring more jobs to the area that doing up the cooling towers. That would bring jobs to the area, and more tourists and visitors. Don't knock them down, save them!!! the people of Sheffield want them saved.

1992. Alison Hayes When my brothers and I were small, these were referred to as 'Granny's Cooling Towers,' as we knew when we saw them that we were getting towards the end of the long car-sick inducing journey from London to Dewsbury to visit her. I believed my parents when they used to say she must have been cleaning them and assumed that one of them was still grubby at the top, not because her ladder wasn't long enough, as she had reached part of the top, but because there must have been an obstruction below preventing her from placing the ladder so that she could reach that last little bit. Perfectly logical when you think about it!
1991. Dr Sonja Ellis The Tinsley Towers are an iconic landmark and are to Sheffield what the Angel of The North is to Gateshead/Newcastle. Surely they can be incorporated into any redevelopment of the surrounding area.
1990. Jonathan Bielby I went to the Channel 4 filming day for the Big Art Project, there's lots of passion and enthusiasm to make something special out of them, if E-on will give the city a chance!

1913. D. P. ATKIN Sheffield is slowly but surely losing all its heritage through the people who want to demolish everything and leave nothing for future generations
1912. Ken Allsebrook They wanna knock them down "just 'cos they can!"
1911. 1881. Mark Taylor
1880. I always think the towers represent how the tinsley area used to be like, full of energy, men going down the pit, making red hot iron, it is criminal for anyone to want them to be demolished. 1849. J Robin Hughes Yet another developer telling Sheffield that what we have is of no value, but with nothing better to offer!

Eon's domestic fuel brand name is Powergen. Switching to another supplier isn't difficult, and losing a few customers might make them take a bit more notice.

1848. Mr Andrew Allan
1847. melissa moss
1846. Trevor Save the towers!! The cooling towers are an excellent landmark! When you see those two towers you know where you are without using a map or SatNav! It'll be another go at forgetting what we once had, just like buildings from the 1960s. Sheffield lost a lot of unique 1960s buildings - never to be seen again! :-(People are saying the towers are ugly, there's beauty in everything industrial. If the last remaining buildings of Blackburn Meadows Power Station are demolished, then I will be disappointed. I will also then get my electricity from another company!
1845. Sophie Risner I agree this is again socio-architectural politics gone fundamentally wrong. It'll be back onto Park Hill next.

1330. Jack Richardson Sheffield's pride, history and status as a great city is currently fighting a losing battle against bland, Leedsesque development and if we are to aspire to greatness, then we must embrace individuality, and the spirit

of the city. These reside in the populus, and not in a slavishness to corporate interests which must by their own rules, make minimal investment, narrowly-self-interested and lowest-common-denominator decisions. That is the way some of our cousin cities are progressing, which is not bestowing upon them greatness, but shall, in years to come, burden them with the embarrassing curse of repeated history. The development of Northern Towns must aspire to more than aping the South East of England, and through that self-belief, thrive. Paint the towers with our self confidence, enduring history and greatness!

1212. Matthew Taylor Well, I hope this is listened to, I don't think that the towers should be removed. Sheffield became famous thanks to industry, and there's no better symbol. They're on the edge of the city next to the M1, thousands of people see them daily and their potential is amazing... why not turn them into something beautiful? Really? It'd do far more for the image of eon than a shed. Imagine the publicity potential, if you have to see it that way... it's immense. Please keep the towers.

1127. pam bowman
1126. John Rogers
1125. graham tiler These Towers are the signposts to a once great industrial age and are as important a landmark on the Sheffield skyline as any great archetectural feature in any city anywhere in the world .While perhaps not containing the majestic beauty of a medievel church or the granduer of a great victorian bridge . They encapsulate the raw earthy energy and vibrant working class indenty that lies at the very heart of the city itself.
1124. Gill Capewell We've already lost the Music Factory, The Yorkshire Grey, The wedding cake registry office etc..please can we save some of Sheffield's history and make it relevant for the present instead of building another corporate warehouse. People arent gonna come and look at a big grey shed in 50 years are they? Stop seeing the pound signs and see sense!!
1123. paul nugent it would look even better than the angel of the north- powergen could compromise by sponsoring it? making it into a london eye type attraction??
1122. Sarah Barber Only the other day I was on the Moors looking over Sheffield, you could see along the valleys & over to Rotherham. The cooling towers were standing proud next to the M1 & I commented on how important a land mark they are. Keep the towers, use them for an arts project & develop them into a visitors centre for Blackburn Meadows a haven for wildlife.
1121. Ed Harrison Make Big Art
1120. Andrew Knight Don't waste the chance to take up such a positive PR exercise. Take this opportunity to make a symbolic and creative gesture on behalf of the people of Sheffield. This would be the chance for Sheffield to have something that equates to the Angel Of The North, bring it on!

1119. Rebecca Morris I hope that EON see the value of working with artists in terms of reaching their Corporate Social Responsibility goals, giving something back to the community, and perhaps bringing a sense of creativity to their business. There could also be huge marketing potential and hopefully a chance to mark EON out as different to its competitors in the energy marketplace.

1108. Julia Harris These towers are unique - developers are all too ready to demolish structures such as these in the interest of 'progress'. This is an opportunity for a really exciting project to happen, which would be another good project and attraction in Sheffield's cap!

962. Kathryn Cooper It's a real stunner driving past the cooling towers, they are beautiful, significant, interesting, too too good to knock down. Please don't. For the sake of Britain having character. Cooling towers so close next to a motorway! it's too unique.
961. Katrin Klosa the Tinsley Cooling Towers are one of the great reminders of Sheffield's industrial past. They give Sheffield a unique landmark visible to millions of people travelling along the M1 every year and would provide such a phenomenal

public art canvas unequalled anywhere else in the world. There is a vision waiting to be taken up by somebody like Channel 4 supporting the development and creation of an inspirational public work of art that could easily become as strong and iconic as The Angel of the North. Don't miss out on this extraordinary opportunity to shape Sheffield's identity as a city with a vision of creativity and culture it so desperately is looking for. Allow the creation of a landmark and sign of the new development for all visible in the so badly battered and poor South Yorkshire.

960. Sarah Bryan To demolish the towers would be a very BIG mistake for Eon Power... just what kind of message would they be portraying to the people of Sheffield by destroying one of its best loved landmarks!

928. Jonathan Brown
927. Joni Tuson I support the big art project, and hope Sheffield can win the Towers
926. Steven Gardner Please leave the lovely Tinsley Towers standing!!
925. oliver smith im fully behind this, and think many more projects like this should get the funding they deserve!
924. lucy since i was a little girl (a budding artist!) I have admired and marvelled at the dramatic mark the towers make on my sheffield. This is a brilliant opportunity to grab that experience, that many people share, and actually enhance it. Lets shout about Sheffield!! and let it be something good for once!
923. Edward Penny Yep....save em innit
922. vanessa wells keep the towers goddammit!!

917. Matthew Austin
916. Mark Parsons This could be one IMMENSE missed opportunity Eon!
915. Lorenza as an 'adopted' mancunian, I have also fallen in love with Sheffield over the years and the cooling towers represent part of the city social history and as such a new life needs to 'be breathed into them' to mark a new beginning for Sheffield and what a better way than using art for this??!!!! Let's not lose this chance!
914. Michael Payton-Greene
913. margaret Collins
912. JESSICA DONT DO IT!!!!!!!!!!

907. Lee Heykoop brilliant idea
906. Patrick Salter

905. Carla Da Costa I am not from Sheffield but have been living here for 3 years, love it and don't want to live anywhere else. Every time I travel back home, I always look for the towers and it would be a true shame not to have them there anymore. Let's fight for them!!!
904. Adam Tinsley The Towers are iconic and are the first thing you look for as you approach Sheffield. Doing something positive with them such as the art project sounds like a wonderful idea. I have a degree in fine art if you need an extra pair of hands!
903. Riona Masebo save them now!!
902. Daniel Lucchesi Stop the Madness
901. Michael Lucchesi They could be wonderful.
900. Yiota Constantinou
899. Dan Trevor
898. Katie Thompson
897. Chris Greenwood Its the only icon Sheffield has got! Knocking them down would be highly symbolic - like the City has finally given up and shut down forever
896. dave moss the cooling towers are a symbol, an icon even of sheffield.everybody has seen them going up or down the M1 and to cover them in art would scream out that sheffield is a cool place to be, which it is. Do something good for a change.
895. Stephanie Thomas Save the towers - they are part of the landscape and identity of the city!
894. Prue CHILES it would be a tragedy to lose a landmark like these
893. Amie Colthart
892. ben otter
891. Felice Fisher
890. Simon Auton Those towers are a fantastic sculptural landmark. Now they are the focus of a community led, nationally supported art project. To knock them down would be corporate blindness and vandalism. Think again Eon.
889. Nick Blood The developers show no imagination. The egeneration benefits of showing Sheffield as the creative place it is far outweigh the benefit of a few poxy minimum wage jobs. I don't think it's wise to encourage people to work in such a heavily polluted area anyway - both noise and vehicle pollution (not to mention the stench of the sewerage works).
888. Richard G Gaete-Holmes I feel very strongly that the cooling towers form a key landmark on the M1 denoting your arrival into Sheffield. They are two structures with fantastic potential, to really form a visual landmark putting Sheffield

on the map. This would be totally lost if they were to be pulled down to make way for non descript warehouses, which can be situated on a variety of other sites.

- 863. Jen Mickelborough
- 862. Janet Emmerson Why should we keep the Parkhill flats and not the cooling towers. Each is as iconic as the other. You don't think about Sheffield without thinking about the towers. When I am returning home from a trip and I see the towers I know that I am nearly home.
- 861. Jenny Wilson
- 860. David Kay I'm heavily involved in economic regeneration and I really believe that cooling towers would be a better inward investment proposition than a tin shed!

807. Eamonn Cronnolly Heritage is finite and irreplaceable. The towers remain a powerful monument to the industrial history of South Yorkshire. To demolish the irreplaceable with such a mediocre ambition would be an act of cultural barbarism.
806. Andrew Dobson (digitonal) This is really, really important. Sheffield is the most beautiful city in the country, partly becuase of its industrial heritage. If you turn it's icons into generic suburban units you will be destroying its soul. The cooling towers must be celebrated, not destroyed.

792. Jonathan Grove The cooling towers are an icon that should be preserved and treasured. I'm all for regeneration, but not destruction of heritage and the towers are symbols of a bygone age, and a reminder to people that they have arrived in the north.
791. Tom Common People want this to happen. They want a good idea to become a reality. Channel 4 want it to happen too. This is the best opportunity we'll have to make something amazing happen in Sheffield. This could change our city.

666. Alison Jackson-Bass The towers are too important historically, socially and aesthetically to demolish.
665. Tony Clay
664. Mark Pettigrew

663. Ben I've always felt that redundant cooling towers such as these would provide a fantastic opportunity for a climbing centre and one located in such an urban area would be ideal. There are so many alternative uses for structures such as this it would be a shame to merely pull them down
662. Anna Deans Don't bring down another Sheffield Landmark the towers are synonymous with the city
661. Danielle Salmon
660. Beth Barker I have loved the cooling towers since I was a kid. They are a landmark and they look amazing on the skyline. Don't knock them down - use them for something different and creative and help put Sheffield on the map for something innovative!

641. Joanne They mark the gateway to Sheffield, knocking them down would be rubbish! Everytime I pass them I feel like I'm home.
640. Lou Hawson Eon claims to have art and culture, community development and community dialogue at the heart of its social responsibility strategy. By keeping the towers Eon could hit all three of these in one go; by knocking them down it proves just how deep those commitments run (not very). It will also lose the trust of everyone who's come to love those towers as a symbol of home. To quote Julie Roberts in Pretty woman (a thing I never thought i'd do): 'Big mistake. Huge.'
639. Elizabeth Milne
638. pete mckee
637. Theo Garman i can not think of anything clever to say. it just makes me sick.

634. M J N De Nobrega Please do not take towers down just cool them
633. Darlene Cox
632. K Wilkie The towers are unique, beautiful, and irreplaceable. They are potentially on show to the whole country as a backdrop to the M1 and the Midland rail route, not to mention the canal, the Supertram, anyone visiting Meadowhall... There are enough faceless industrial and retail units along our major transport routes in this country. Let's keep and care for these unique and impressive features to show everyone how proud we are of our area.
631. Helen Clarke
630. Elizabeth Boyle

As a Sheffield resident myself, I am saddened by the news that e.on have decided to demolish the towers. The creativity of Sheffield has to be recognised for the culture to grow and big business should play a part in this, as should all. Not forgetting that culture itself makes cities more attractive to business and increases incoming investment. I hope e.on takes this seriously, as to not do so is a sign to customers in Sheffield that we are not respected.

174. Stefan Janusz Somebody has already made the point that, by not just demolishing the towers, and by instead having the balls to allow them to become vast statements of public, community art, you will do wonders for your reputation as a company. And that's basically the point, for your part of the bargain. Doing something this amazing will enhance people's lives, every day. Give people a focus, a symbol. What this city is, its history and future. Surely E. ON/Powergen would wish to enhance their public image by working with potential customers to make the best use of currently disused structures? On the other hand, simply demolishing the towers shows a disregard of the wishes of many people in Sheffield; shows you share none of the excitement and grand vision that has inspired the project so far; that you are just another bland, faceless corporate machine. It doesn't have to be like that. You have the choice, and we implore you to do the right thing. Sheffielders have a strong track record for voting with their feet.

Sheffield's Cooling Towers say something unique, something about the past and could say something about the future. We need to keep them.

119. Nikki Shanahan I thought Powergen was supposed to be green, this is bad for Sheffield and for the company. I shan't be a customer anymore!
118. Dominic Briere-Edney We have to save the Towers - I've fought too hard and I'm not giving up now!!!
117. Mattie Lafferty
116. Bozz (Hiem) These two big towers are the first thing poeple usually see ,as they make there way into our lovely green happening city ,they are very impor tant to sheffield culture as much as Pulp or knives and forks ,and so as the battle for the two towers begins ,even tolkien wrote a book about this.peace Bozz xx

105. Derek Farquhar A link to Sheffield's industrial heritage and therefore should be retained
104. rita grayson changed my mind i would like them painted

98. David Mitchell
97. Craig Sallabank keep the towers please.
96. Alan Deadman stand up against greedy unimaginative developers and a Council with no guts
95. Martin Cater I believe these are the oldest cooling towers still standing anywhere in the UK. Before all the remaining coal fired power stations are wiped off the map, isn't it worth preserving something of them for the future? Cooling towers are unique, monumental architectural creations, and the two still standing at Tinsley are amongst the oldest and rarest survivors, not only in the UK but anywhere in the world.
94. Diane Rodgers-Wilson
93. Julian Dobson These towers could stand for 25 years as a symbol of Sheffield's regeneration. Or we could have a few sheds with jobs that will disappear with the next recession. Isn't it time we were a bit less short-sighted?
92. Sam Marsh Please reconsider this extremely short-sighted decision. I am sure you will lose plenty of business in the Sheffield & Rotherham area with people switching away from Powergen if you go ahead with your plans. I will certainly do my bit to bring this story into full public awareness. For the sake of good publicity and goodwill to Sheffield, allow the local community to have a say in the Towers' future.
91. David Mills With these gone, what would be the point of Sheffield?

83. carly lattimore

82. Chris Nelson these are a great landmark to the thousands of people who enter, or travel through the city both by car along the M1 or by rail along the dearne valley line. removing them would be a terrible shame, especially as the site isn't exactly popular!
81. Haydn Vernals These towers are an iconic link to Sheffield's industrial past, we cannot let them be destroyed to make way for faceless boxes of a modern age, that will house call centres, service industry and help desks - I call upon you to recognise the great industrial past and make these towers the main attraction of a museum dedecated to the great acheivements in the area.
80. Chris Marshall Looks fabulous from the M1 - the city would lose its symbolic gateway without the towers!
79. James Dowden

77. Will Scurrrell

75. Ben Duong Iconic. Bold. Special. Part of Sheffield's cultural heritage.
74. Chris Ugly, yes. But a very important reminder of the area's history, and significant landmarks on the Motorway to draw curious visitors to the town - i.e. making it stand out from others surrounding it. Much more relevant than the angel of the north on the A.1 at any rate...
73. Rob
72. Eran Propper
71. Thomas O'Hara We cannot let these towers be demolished, they are far too important to the city and its identity. Renovate them and turn them into an angel of the north for sheffield

32. Jonathan Webber (1) These towers are an icon of Sheffield's heritage and with the help of GO and Channel 4 could become an icon of Sheffield's future. They are beautiful as

they already are, but if the Big Art project goes ahead, they will become a landmark of international renown and an unmistakable symbol of Sheffield's creative culture. (2) They stand by the country's main arterial motorway, exactly half-way up the length of England (as the crow would fly, from Portsmouth to Berwick) and half way across (as the same crow would fly, from east coast to west); they are at the very centre of England, its true heartland, gateway to the North (or, if you like, the South). So, (3) Please do not waste this unique opportunity!

17. Lucy Davies I think you could do a lot of good for your reputation if you choose not to demolish the towers. There is a great deal of support for keeping them standing, they look amazing and are part of what makes Sheffield unique, and there are some amazing ideas about what to do with them. I think you're in danger of appearing to be the big corporate baddies if you choose to demolish them. A lot of ordinary people in Sheffield would be really disappointed.
16. Fiona Maddock Please don't demolish the towers!! I love driving past them! they are part of Sheffield's heritage and a very distinctive landmark, they would be very sadly missed by me and so many others!!

7. Tom Keeley Cooling the towers project is not a pipe dream. The Big art project is making it happen. A curator is being lined up, funding is being sought, and the project has the support of regional development agencies, Sheffield City Council and such high profile figures such as Antony Gormley. Demolition would be a massive missed opportunity. there are no other landmarks to speak of in Sheffield. There are no better symbols of what the city used to be and what it has become. They are ugly at the moment, it's true. But we don't just want to save the towers; we want to change them, turn them into something beautiful. Something that reflects what Sheffield means today: green, creative, and different. Don't let some suit decide what our landmarks should be, this city is ours.
